Excelsoft Technologies- Company Profile

Excelsoft provides innovative technology-based solutions catering to the needs of educational publishers, testing & assessment companies, universities, schools and corporate learning & development. We architect, design and develop learning environments, testing & assessment systems and other digital solutions for some of the best known corporations and academic institutions world-wide.

Our products include SARAS – Learning & Assessment Systems, OpenPage – our interactive ebook ecosystem and CollegeSparc - a student success solution.

SARAS – technology solutions framework and the product suite developed around it provides a complete infrastructure for technology enabled learning and assessment solutions.

SARAS Assessment Management System (AMS) has been providing a high quality solution across sectors from licensing, certification and high stakes examinations to corporate assessments and test preparation. SARAS AMS has been adopted globally as a platform to increase the versatility of test management and delivery. Computer Based Tests (CBTs) delivered through the SARAS AMS have ensured that assessments happen as per norms, overcome infrastructural barriers, maintain test integrity and provide extensive analysis of test performance.

SARAS Learning solutions have been successfully implemented at universities, schools, companies and governments globally. Saras learning management system enables all activities such as course management, content delivery, tracking of learning activities, analytics, reports and dashboards.

OpenPage, our digital interactive ebook ecosystem, is an end-to-end interactive eTextbook publishing platform that enables publishers to create, enrich, publish, distribute and deliver eTextbooks across platforms and devices for a highly personalized and analytics driven learning experience.

CollegeSparc is Excelsoft's solution for empowering students for success through an integrated suite of intelligent, data-driven academic and career module. Through an integrated set of intelligent self-help tools, EPS enables students to prepare for learning, explore careers, choose a major, plan courses, develop competencies, improve academic performance, connect with professional mentors and succeed in their academic and career goals.

Excelsoft has, over the years, demonstrated its ability to execute large offshore projects within the agreed timelines working closely with the client's team in a remote location. By virtue of technical and communication skills, our team establishes a very good working relationship during the project.

Excelsoft has been working with clients in various geographies including North America, Europe, Middle East and Asia Pacific region, over the last 18 years. This has helped our teams develop a good understanding of the cultural aspects of the respective countries. This factor gives us a definite edge in our offshore development efforts.

As a thought leader, we invest significantly in R&D to maintain the competitive edge of our offerings and to build on our IP. This ensures that the future challenges of our customers are anticipated and overcome ensuring smooth delivery. We build long-term relationships with our customers based on assured reliability now and in the future.

Having worked with reputed customers and partners over the decade, we have gathered a significant amount of experience and best practices specific to the education and training space. As a pure-play learning and assessment solutions company, we know what works and what doesn't. This distilled knowledge enables us to create powerful solutions that deliver great results to our customers. Excelsoft as an organization has grown consistently since inception establishing a good reputation for itself in the education technology space globally.

Our global exposure and in-depth understanding of multiple industry domains helps us deliver specialized content in a very cost-effective manner. Experienced instructional design and course authoring teams are our strengths in developing quality e-learning content. We specialize in setting up realistic success metrics for projects which ensure accurate gauging of learners' skill levels upon course completion.

The key attributes of our solutions are attractive Total Cost of Ownership (TCO), quick Return on Investment (RoI) and rapid deployment. The suite with its inbuilt power of configuration and orchestration of business services helps create and modify workflows cost-effectively with quick turnaround times. The architecture conforms to Service Oriented Architecture (SOA) governance standards and enables Reusability, Extensibility, Scalability and Performance.
