UNLOCK THE FUTURE WITH IMMERSIVE TECHNOLOGY

AR & VR Development Services by Excelsoft Technologies

Excelsoft specializes in crafting transformative AR and VR experiences that redefine how people interact with digital content. We empower organizations to reimagine how they train, sell, educate, and connect, through immersive AR and VR solutions. Whether you're enhancing customer experience or streamlining operations, our team delivers scalable, high-impact applications that drive results.

Augmented Reality (AR)

- AR Development: Marker-based & Markerless AR
- AR for product visualization, training, and marketing
- AR for retail, education, and training
- Integration with real-world environments using ARKit, ARCore, and Vuforia
- WebAR for browser-based experiences

Virtual Reality (VR)

- VR tours and exploration for real estate, hospitality, and manufacturing
- Multi-user VR environments for collaboration and real time support
- Fully immersive VR environments- Multiplayer and social VR experiences
- VR Development with simulations for healthcare, manufacturing, and real estate
- VR Training Simulator and VR-Led Skill Assessments

We've delivered immersive solutions for:

- Healthcare: VR therapy, surgical simulations, AI powered mental wellness
- Corporate Training: AR-based manuals, virtual workshops and specialized labs
- Architecture: VR walkthroughs, AR overlays, walk along experiences
- Retail: AR product visualization, virtual try-ons, virtual dark stores
- Manufacturing: VR training, AR maintenance guides
- HSE: Virtual Fire drills, Evacuation Experiences, operating fire equipment

Why Choose Us

- 5+ years in immersive tech development
- Cross-platform deployment expertise
- Proven track record with clients
- Agile development with rapid prototyping
- End-to-end support: concept to launch

Let's Build the Future Together
