

Delivering Your Assessment Ambitions

We are your end-to-end technology partner for modern awarding. Building on our core capabilities in authoring, secure exam delivery, proctoring and marking, our advanced AI workflows solve the most complex awarding challenges for organisations.

“We want fair marking- but a student’s grade can still be influenced by their handwriting, not their knowledge.”

AI Handwriting Transcription

Our explainable AI reads, interprets, and presents handwritten scripts with high accuracy- including strikethroughs, rewrites, and the messy corrections that defeat standard OCR. Every interpretive decision is recorded and fully auditable.

Shortlisted, eAA 2026 International Awards.

“We need to know our item bank is free from bias and fit for purpose- but checking thousands of items manually is impossibly expensive.”

AI Item Bank Validation & Generation

AI-driven checks scan your entire item bank against multiple quality filters- bias, language standards, accessibility, and regulatory alignment- replacing costly manual review. Pair this with AI-powered item generation and you cut authoring turnaround, with workflow automation and shorter review cycles.

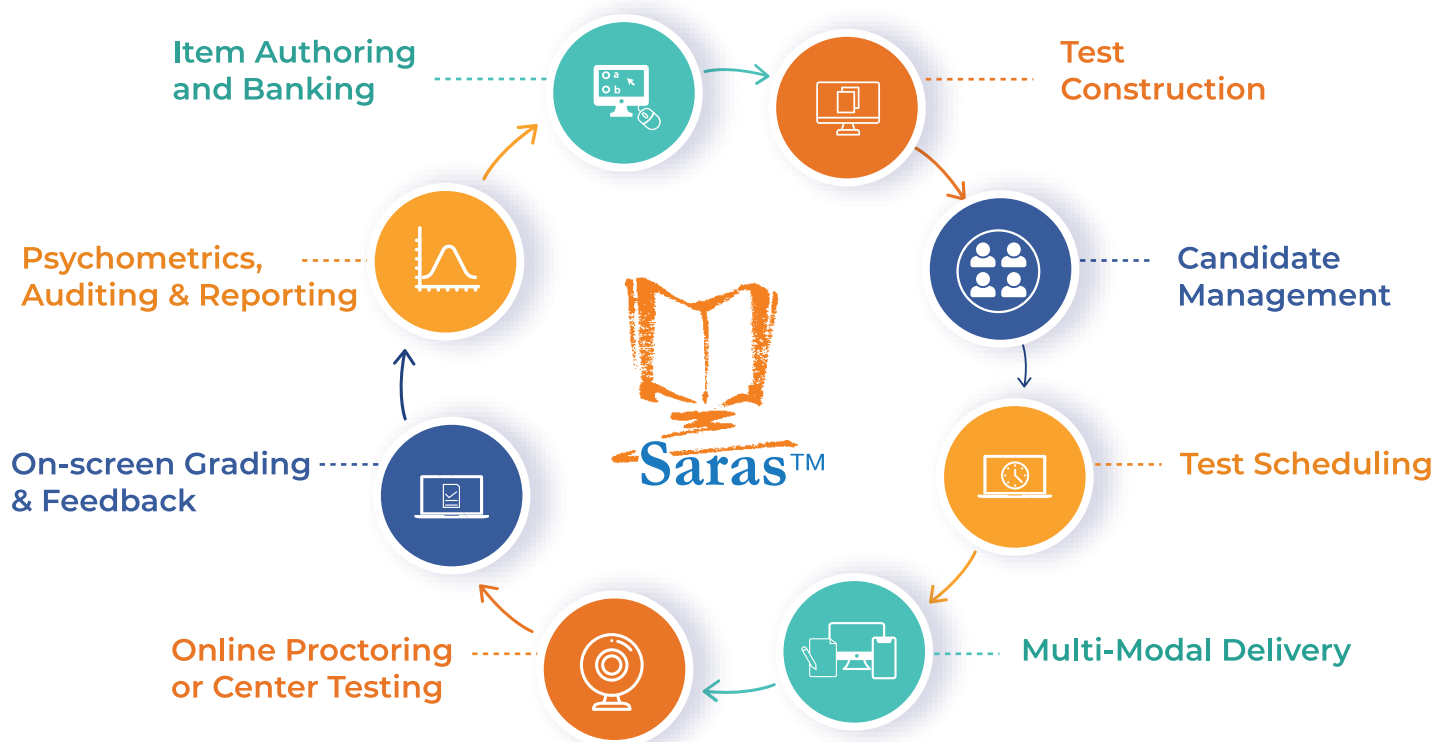

“We need to deliver secure, high-stakes exams in locations where the internet is unreliable- or doesn’t exist.”

Saras Assessments in a Box

A fully secure, standalone test centre in one portable pocket size box. Turn it on, connect your devices, and you are live. There are no servers to install and zero reliance on web connectivity. It provides a seamless, high-capacity testing experience for every candidate, completely isolated from outside networks.

Your Technology Partner for Assessment and Awarding Operations

Unlock limitless testing potential with Saras™, a proven platform fit-for-purpose to address your evolving assessment and online proctoring needs. Enhance your ecosystem with our modular AI Micro-Apps, allowing you to elevate your learning and assessment experience—one smart solution at a time.

Integrating all core modules—from secure delivery to AI-driven marking—into one unified ecosystem.

Let's turn assessment ambitions into measurable outcomes

Tell us about the challenge that's holding you back.
We'll show you what's possible.

Arrange a discovery meeting with our team.
